

What do I want to do when I grow up?

When you get older, you will need a job. There are a lot of different jobs you could do, like being a teacher, truck driver, doctor, or a pilot. The best jobs are ones where you get to do something you already like to do.

Let's discover what you **like** to do now and how that might help you decide what you **want** to do when you grow up.

Note to Teachers

This publication is designed to help young students get a very basic understanding of occupations and careers by correlating their interests with various occupations.

Most of these worksheets are for grades one and two, but a few worksheets are advanced enough for grade three. You can print out and use all the worksheets, or just the ones you think are best suited to the age and skill level of your students.

We hope you find this publication fun and useful.
